

ProjectOne - 04 User Personas (Draft v0.1)

Purpose

Define the primary user personas that ProjectOne is designed to serve.

Persona 1 – Solo Creator

Runs one or more content channels alone. Wants to save time, automate repetitive work and publish consistently without hiring a team.

Goals

Increase output, maintain quality, reduce editing time, grow audience and revenue.

Challenges

Too many tools, repetitive tasks, limited time and inconsistent workflows.

Persona 2 – Content Business

A small company or entrepreneur producing content as part of a larger business.

Goals

Standardize production, automate processes and improve collaboration while keeping quality high.

Challenges

Scaling production, maintaining consistency and reducing operational costs.

Persona 3 – Small Creator Team

A team of creators, editors and managers working together on multiple channels.

Goals

Centralize workflows, coordinate production and simplify approvals.

Challenges

Communication, version control and fragmented tools.

Shared Characteristics

All personas value time, consistency, transparency, automation, quality and long-term business growth over short-term experimentation.
