

ProjectOne - 11 Dashboard (Draft v0.1)

Purpose

The Dashboard is the user's home page and provides an immediate overview of everything that matters.

Objectives

Allow users to understand the current status of their content business within seconds and quickly access the most important actions.

Key Components

Recent projects, active AI workflows, notifications, upcoming publications, analytics summary, AI recommendations, cost summary and quick actions.

Quick Actions

Create Project, Continue Project, Chat with AI, Upload Files, Review Approvals and View Analytics.

Design Principles

Clean, fast, customizable, minimal clicks, no unnecessary information and clear visual hierarchy.

Success Criteria

A returning user can understand what needs attention and start meaningful work in less than 30 seconds.
