

ProjectOne - 16 Billing (Draft v0.1)

Purpose

The Billing module manages subscriptions, payments, usage, invoices and account limits in a transparent and predictable way.

Objectives

Provide users with complete visibility over plans, costs, AI usage and subscription status while making upgrades and payments simple.

Core Capabilities

Subscription management, monthly and yearly plans, invoice history, payment methods, usage tracking, plan comparison, upgrades, downgrades and cancellation.

Usage & Limits

Display AI consumption, generated minutes, storage usage, API usage, plan limits, warnings and estimated upcoming charges before limits are reached.

Design Principles

Transparent pricing, no hidden costs, predictable billing, clear upgrade paths and user control over spending.

Success Criteria

Users always understand what they are paying for, what they have used and what will happen before additional charges occur.
