

ProjectOne - 05 User Journey (Draft v0.1)

Purpose

Define the ideal end-to-end journey a user experiences while using ProjectOne.

Step 1 – Discover

The user discovers ProjectOne through content, recommendations or marketing and understands its value proposition.

Step 2 – Sign Up

The user creates an account, completes onboarding, connects platforms and configures AI providers.

Step 3 – First Success

The user creates the first project, generates content and experiences measurable time savings within minutes.

Step 4 – Daily Workflow

ProjectOne becomes the central workspace for planning, generating, editing, publishing and monitoring content.

Step 5 – Optimization

The AI analyzes performance, learns preferences and continuously recommends improvements.

Step 6 – Growth

The user scales to multiple channels, workflows and automations while maintaining a simple, unified experience.

Desired Outcome

ProjectOne becomes the user's default operating system for running a content business.
